Compare √ **cāy**, which appears to be an early specialized form of this root; **cay** (BR. 3 **ci**) is another. The forms and derivatives of 2 **ci** are not everywhere well separable from those of 1 **ci**, and there is reason to suspect the two roots of being ultimately one; words with the prefixes **nis** and **vi**, especially, are probably best referred to 1 **ci**, with the meaning 'take apart', and so 'resolve, decide'.

√ cit, 'perceive, know, appear'.

Compare roots 2 **ci** and **cint.** The grammarians give two separate roots, **kit** and **cit**, each with full sets of forms — which are not all reported here.

√ cint, 'think'.

Perhaps the denominative of a nasalized derivative of √ **cit.**
